Meeting #2 with Sauk River watershed

Present : John R., Steve, Allison
Ed, Tyler, Vic, Charlie, Harry, Debbie

Allison presents:

our curly leaf problem releases phosphorus back in the lake and the bottom loading of the lake is 75% and stays and settles.

Create a 5-10 year plan

- how to deal with the internal loading
- how to deal with the curly leaf
- landscape- keeping shorelines where they are
- water quality control

Pearl Lake needs to start assessing on a regular schedule the oxygen levels

citizen monitoring to show data to apply for grants needs to be maintained.

PLLA needs to set up a monitoring program

association would provide the man power

association would submit lab samples to the watershed lab

the watershed will keep those lab results and create reports.

Watershed will educate citizens on proper sampling and techniques

April 2024 creating and developing a monitoring plan

April till Freeze up

-test 2 locations 1 x month

secci disk measurements 2 x month

sample all inlets also 2 x month

sampling estimated cost is \$70 monthly

staff/courier report \$250

Board has approved to work with the Sauk River Watershed to move forward with creating plans for the lake health.
